

VSIG4 Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP18884b

Specification

VSIG4 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

Q9Y279

VSIG4 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 11326

Other Names

V-set and immunoglobulin domain-containing protein 4, Protein Z39Ig, VSIG4, CRIg, Z39IG

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

VSIG4 Antibody (C-term) Blocking Peptide - Protein Information

Name VSIG4

Synonyms CRIg, Z39IG

Function

Phagocytic receptor, strong negative regulator of T-cell proliferation and IL2 production. Potent inhibitor of the alternative complement pathway convertases.

Cellular Location

Membrane; Single-pass type I membrane protein

Tissue Location

Abundantly expressed in several fetal tissues. In adult tissues, highest expression in lung and placenta. Expressed in resting macrophages.

VSIG4 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

VSIG4 Antibody (C-term) Blocking Peptide - Background

This gene encodes a v-set and immunoglobulin-domaincontaining protein that is structurally related to the B7 family ofimmune regulatory proteins. The encoded protein may be a negative regulator of T-cell responses. This protein is also a receptor for the complement component 3 fragments C3b and iC3b. Alternatesplicing results in multiple transcript variants. [provided byRefSeq].
