PFDN4 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP19024a

Specification

PFDN4 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession   [Q9NQP4](#)

PFDN4 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 5203

Other Names
Prefoldin subunit 4, Protein C-1, PFDN4, PFD4

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PFDN4 Antibody (N-term) Blocking Peptide - Protein Information

Name PFDN4

Synonyms PFD4

Function
Binds specifically to cytosolic chaperonin (c-CPN) and transfers target proteins to it. Binds to nascent polypeptide chain and promotes folding in an environment in which there are many competing pathways for nonnative proteins.

Cellular Location
Nucleus. Cytoplasm. Mitochondrion

PFDN4 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PFDN4 Antibody (N-term) Blocking Peptide - Background

This gene encodes a member of the prefoldin beta subunitfamily. The encoded protein is one of six subunits of prefoldin, amolecular chaperone complex that binds and stabilizes newlysynthesized polypeptides, thereby allowing them to fold correctly.The complex, consisting of two alpha and four beta subunits, formsa double beta barrel assembly with six protruding coiled-coils.
