

MIXL1 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP19284c**Specification**

MIXL1 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [Q9H2W2](#)**MIXL1 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 83881**Other Names**

Homeobox protein MIXL1, Homeodomain protein MIX, hMix, MIX1 homeobox-like protein 1, Mix1 homeobox-like protein, MIXL1, MIXL

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MIXL1 Antibody (Center) Blocking Peptide - Protein Information**Name** MIXL1**Synonyms** MIXL**Function**

Transcription factor that play a central role in proper axial mesendoderm morphogenesis and endoderm formation. Required for efficient differentiation of cells from the primitive streak stage to blood, by acting early in the recruitment and/or expansion of mesodermal progenitors to the hemangioblastic and hematopoietic lineages. Also involved in the morphogenesis of the heart and the gut during embryogenesis. Acts as a negative regulator of brachyury expression (By similarity).

Cellular Location

Nucleus {ECO:0000255|PROSITE-ProRule:PRU00108, ECO:0000269|PubMed:12070013, ECO:0000269|PubMed:17303500}

Tissue Location

Restricted to progenitors and secondary lymph tissues. In normal hematopoiesis, it is restricted to immature B- and T-lymphoid cells. Present in differentiating embryonic stem cells (at protein level).

MIXL1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

MIXL1 Antibody (Center) Blocking Peptide - Background

Homeodomain proteins, such as MIXL1, are transcriptionfactors that regulate cell fate during development (Hart et al.,2005 [PubMed 15982639]).
