

GTF2IRD2B Antibody(C-term) Blocking peptide
Synthetic peptide
Catalog # BP19546b**Specification**

GTF2IRD2B Antibody(C-term) Blocking peptide - Product InformationPrimary Accession [Q6EKJ0](#)**GTF2IRD2B Antibody(C-term) Blocking peptide - Additional Information****Gene ID** 389524**Other Names**

General transcription factor II-I repeat domain-containing protein 2B, GTF2I repeat domain-containing protein 2B, Transcription factor GTF2IRD2-beta, GTF2IRD2B

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GTF2IRD2B Antibody(C-term) Blocking peptide - Protein Information**Name** GTF2IRD2B**Cellular Location**

Nucleus.

Tissue Location

Ubiquitous.

GTF2IRD2B Antibody(C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)

GTF2IRD2B Antibody(C-term) Blocking peptide - Images**GTF2IRD2B Antibody(C-term) Blocking peptide - Background**

This gene encodes a glycosylated phosphoprotein with a leucine zipper motif, two helix-loop-helix

motifs (1 repeats) that are similar to domains found in the TFII-I family of transcription factors, one CHARLIE8 transposable element-like sequence, and a BED zinc finger. This gene lies within a region that is deleted in Williams-Beuren syndrome. Alternatively spliced variants which encode different protein isoforms have been described; however, not all variants have been fully characterized.
