

## OR11A1 Blocking Peptide(C-term)

Synthetic peptide Catalog # BP19674b

### **Specification**

## OR11A1 Blocking Peptide(C-term) - Product Information

Primary Accession O9GZK7
Other Accession NP 039225.1

## OR11A1 Blocking Peptide(C-term) - Additional Information

**Gene ID 26531** 

#### **Other Names**

Olfactory receptor 11A1, Hs6M1-18, Olfactory receptor 11A2, Olfactory receptor OR6-30, OR11A1, OR11A2

### **Target/Specificity**

The synthetic peptide sequence is selected from aa 294-306 of HUMAN OR11A1

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# OR11A1 Blocking Peptide(C-term) - Protein Information

Name OR11A1

Synonyms OR11A2

**Function** 

Odorant receptor.

**Cellular Location** 

Cell membrane; Multi-pass membrane protein.

# OR11A1 Blocking Peptide(C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

### • Blocking Peptides

# OR11A1 Blocking Peptide(C-term) - Background

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.
