

OR6K3 Blocking Peptide(N-term)
Synthetic peptide
Catalog # BP19687a**Specification**

OR6K3 Blocking Peptide(N-term) - Product Information

Primary Accession [Q8NGY3](#)
Other Accession [NP_001005327.2](#)

OR6K3 Blocking Peptide(N-term) - Additional Information

Gene ID 391114

Other Names

Olfactory receptor 6K3, Olfactory receptor OR1-18, OR6K3

Target/Specificity

The synthetic peptide sequence is selected from aa 95-106 of HUMAN OR6K3

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

OR6K3 Blocking Peptide(N-term) - Protein Information

Name OR6K3

Function

Odorant receptor.

Cellular Location

Cell membrane; Multi-pass membrane protein.

OR6K3 Blocking Peptide(N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

OR6K3 Blocking Peptide(N-term) - Background

Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and proteins for this organism is independent of other organisms.
