

GPR77 Blocking Peptide (C-term)

Synthetic peptide Catalog # BP20046b

Specification

GPR77 Blocking Peptide (C-term) - Product Information

Primary Accession O9P296
Other Accession NP 060955.1

GPR77 Blocking Peptide (C-term) - Additional Information

Gene ID 27202

Other Names

C5a anaphylatoxin chemotactic receptor 2, Complement component 5a receptor 2, G-protein coupled receptor 77, C5AR2, C5L2, GPR77

Target/Specificity

The synthetic peptide sequence is selected from aa 312-325 of HUMAN C5AR2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GPR77 Blocking Peptide (C-term) - Protein Information

Name C5AR2

Synonyms C5L2, GPR77

Function

Receptor for the chemotactic and inflammatory C3a, C4a and C5a anaphylatoxin peptides and also for their dearginated forms ASP/C3adesArg, C4adesArg and C5adesArg respectively. Couples weakly to G(i)-mediated signaling pathways.

Cellular Location

Cell membrane; Multi-pass membrane protein

Tissue Location

Frontal cortex, hippocampus, hypothalamus, pons and liver.

GPR77 Blocking Peptide (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

GPR77 Blocking Peptide (C-term) - Background

The anaphylatoxins C3a (see MIM 120700), C4a (see MIM 120810), and C5a are cationic fragments generated during the complement cascade that participate in host defense. In the case of inappropriate complement activation, anaphylatoxins may be involved in autoimmunity and sepsis. C5L2 is coexpressed with the C5a receptor, C5AR (C5R1; MIM 113995), on polymorphonuclear neutrophils and may modulate C5AR activity (Gerard et al., 2005 [PubMed 16204243]).
