

CCNB3 Blocking Peptide (C-term S1331/S1333)

Synthetic peptide

Catalog # BP20414b

Specification

CCNB3 Blocking Peptide (C-term S1331/S1333) - Product Information

Primary Accession

[Q8WWL7](#)**CCNB3 Blocking Peptide (C-term S1331/S1333) - Additional Information**

Gene ID 85417

Other Names

G2/mitotic-specific cyclin-B3, CCNB3, CYCB3

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CCNB3 Blocking Peptide (C-term S1331/S1333) - Protein Information

Name CCNB3

Synonyms CYCB3

Function

Cyclins are positive regulatory subunits of the cyclin- dependent kinases (CDKs), and thereby play an essential role in the control of the cell cycle, notably via their destruction during cell division. Its tissue specificity suggest that it may be required during early meiotic prophase I.

Cellular Location

Nucleus.

Tissue Location

Testis specific. In testis, it is expressed in developing germ cells, but not in Leydig cells. Weakly or not expressed in other tissues.

CCNB3 Blocking Peptide (C-term S1331/S1333) - Protocols

Provided below are standard protocols that you may find useful for product applications.
