

BLVRA Blocking Peptide (Center Y83)

Synthetic peptide

Catalog # BP20430c

Specification

BLVRA Blocking Peptide (Center Y83) - Product Information

Primary Accession

[P53004](#)**BLVRA Blocking Peptide (Center Y83) - Additional Information**

Gene ID 644

Other Names

Biliverdin reductase A, BVR A, Biliverdin-IX alpha-reductase, BLVRA, BLVR, BVR

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

BLVRA Blocking Peptide (Center Y83) - Protein InformationName BLVRA ([HGNC:1062](#))**Function**

Reduces the gamma-methene bridge of the open tetrapyrrole, biliverdin IX alpha, to bilirubin with the concomitant oxidation of a NADH or NADPH cofactor (PubMed:8631357, PubMed:8424666, PubMed:7929092). Uses the reactants NADH or NADPH depending on the pH; NADH is used at the acidic pH range (6-6.9) and NADPH at the alkaline range (8.5-8.7) (PubMed:8631357, PubMed:8424666, PubMed:7929092). NADPH, however, is the probable reactant in biological systems (PubMed:7929092).

Cellular Location

Cytoplasm, cytosol

Tissue Location

Liver.

BLVRA Blocking Peptide (Center Y83) - Protocols

Provided below are standard protocols that you may find useful for product applications.
