

**SLC2A4 Blocking Peptide (C-term)**

Synthetic peptide

Catalog # BP20794c

**Specification**

---

**SLC2A4 Blocking Peptide (C-term) - Product Information**

Primary Accession

[P14672](#)

Other Accession

[P19357](#), [P14142](#)**SLC2A4 Blocking Peptide (C-term) - Additional Information**

Gene ID 6517

**Other Names**

Solute carrier family 2, facilitated glucose transporter member 4, Glucose transporter type 4, insulin-responsive, GLUT-4, SLC2A4, GLUT4

**Target/Specificity**

The synthetic peptide sequence is selected from aa 495-509 of HUMAN SLC2A4

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**SLC2A4 Blocking Peptide (C-term) - Protein Information**Name SLC2A4 ([HGNC:11009](#))**Function**

Insulin-regulated facilitative glucose transporter, which plays a key role in removal of glucose from circulation. Response to insulin is regulated by its intracellular localization: in the absence of insulin, it is efficiently retained intracellularly within storage compartments in muscle and fat cells. Upon insulin stimulation, translocates from these compartments to the cell surface where it transports glucose from the extracellular milieu into the cell.

**Cellular Location**

Cell membrane {ECO:0000250|UniProtKB:P14142}; Multi-pass membrane protein {ECO:0000250|UniProtKB:P14142} Endomembrane system; Multi-pass membrane protein. Cytoplasm, perinuclear region {ECO:0000250|UniProtKB:P14142}. Note=Localizes primarily to the perinuclear region, undergoing continued recycling to the plasma membrane where it is rapidly reinternalized (PubMed:8300557). The dileucine internalization motif is critical for intracellular sequestration (PubMed:8300557). Insulin stimulation induces translocation to the cell membrane

(By similarity) {ECO:0000250|UniProtKB:P14142, ECO:0000269|PubMed:8300557}

**Tissue Location**

Skeletal and cardiac muscles; brown and white fat.

**SLC2A4 Blocking Peptide (C-term) - Protocols**

Provided below are standard protocols that you may find useful for product applications.
