

Mouse Srms Blocking Peptide (Center)
Synthetic peptide
Catalog # BP21128a**Specification**

Mouse Srms Blocking Peptide (Center) - Product Information

Primary Accession [Q62270](#)

Mouse Srms Blocking Peptide (Center) - Additional Information**Other Names**

Tyrosine-protein kinase Srms, PTK70, Srms, Srm

Target/Specificity

The synthetic peptide sequence is selected from aa 113-127 of HUMAN Srms

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Mouse Srms Blocking Peptide (Center) - Protein Information**Name Srms****Synonyms Srm****Function**

Non-receptor tyrosine-protein kinase which phosphorylates DOK1 on tyrosine residues. Also phosphorylates KHDRBS1/SAM68 and VIM on tyrosine residues. Phosphorylation of KHDRBS1 is EGF-dependent. Phosphorylates OTUB1, promoting deubiquitination of RPTOR.

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:Q9H3Y6}. Note=Localizes to punctate cytoplasmic structures {ECO:0000250|UniProtKB:Q9H3Y6}

Tissue Location

Higher expression in liver, lung, thymus and skin than in brain, kidney, heart and spleen (PubMed:9226137). In skin, highly expressed in keratinocytes (PubMed:9226137). Abundant in lung, liver, spleen, kidney and testis and is also detected in the cerebrum (PubMed:7935409).

Mouse Srms Blocking Peptide (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.

Mouse Srms Blocking Peptide (Center) - Background

Non-receptor tyrosine-protein kinase which phosphorylates DOK1 on tyrosine residues. May be involved in proliferation or differentiation of keratinocytes in the skin.
