

GABRQ Blocking Peptide (C-term)

Synthetic peptide

Catalog # BP21196b

Specification

GABRQ Blocking Peptide (C-term) - Product Information

Primary Accession

[Q9UN88](#)**GABRQ Blocking Peptide (C-term) - Additional Information**

Gene ID 55879

Other Names

Gamma-aminobutyric acid receptor subunit theta, GABA(A) receptor subunit theta, GABRQ

Target/Specificity

The synthetic peptide sequence is selected from aa 451-465 of HUMAN GABRQ

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GABRQ Blocking Peptide (C-term) - Protein Information

Name GABRQ

Function

GABA, the major inhibitory neurotransmitter in the vertebrate brain, mediates neuronal inhibition by binding to the GABA/benzodiazepine receptor and opening an integral chloride channel.

Cellular Location

Postsynaptic cell membrane; Multi-pass membrane protein. Cell membrane; Multi-pass membrane protein

GABRQ Blocking Peptide (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
