

GNL3 Blocking Peptide (N-term)
Synthetic peptide
Catalog # BP21197a**Specification**

GNL3 Blocking Peptide (N-term) - Product InformationPrimary Accession [Q9BVP2](#)**GNL3 Blocking Peptide (N-term) - Additional Information****Gene ID** 26354**Other Names**

Guanine nucleotide-binding protein-like 3, E2-induced gene 3 protein, Novel nucleolar protein 47, NNP47, Nucleolar GTP-binding protein 3, Nucleostemin, GNL3, E2IG3, NS

Target/Specificity

The synthetic peptide sequence is selected from aa 91-104 of HUMAN GNL3

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GNL3 Blocking Peptide (N-term) - Protein Information**Name** GNL3**Synonyms** E2IG3, NS**Function**

May be required to maintain the proliferative capacity of stem cells. Stabilizes MDM2 by preventing its ubiquitination, and hence proteasomal degradation (By similarity).

Cellular Location

Nucleus {ECO:0000250|UniProtKB:Q811S9}. Nucleus, nucleolus. Note=Shuttles between the nucleus and nucleolus. {ECO:0000250|UniProtKB:Q811S9}

Tissue Location

Increased levels in lung tissue in cancer patients.

GNL3 Blocking Peptide (N-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.
