

Zebrafish pou5f1 Blocking Peptide (Center)
Synthetic peptide
Catalog # BP21659c**Specification**

Zebrafish pou5f1 Blocking Peptide (Center) - Product Information

Primary Accession [Q90270](#)

Zebrafish pou5f1 Blocking Peptide (Center) - Additional Information

Gene ID 30333

Other Names

POU domain, class 5, transcription factor 1, POU domain protein 2, pou5f1, gp-9, pou-2, pou2

Target/Specificity

The synthetic peptide sequence is selected from aa 117-132 of HUMAN pou5f1

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Zebrafish pou5f1 Blocking Peptide (Center) - Protein Information

Name pou5f1

Synonyms gp-9, pou-2, pou2

Function

Involved in early development of embryos, especially in the process of gastrulation. May play an important role in establishing and specifying rhombomeric segments. Seems to be required to maintain the cells in a highly undifferentiated state. In contrast to POU2, T-POU2 lacks DNA-binding activity because of its incomplete pou domain structure. Overexpression of POU2 does not have any effect on development, whereas overexpression of t-POU2 causes developmental retardation or arrest before gastrulation.

Cellular Location

Nucleus.

Zebrafish pou5f1 Blocking Peptide (Center) - Protocols

Provided below are standard protocols that you may find useful for product applications.
