

RCE1 Antibody (N-term W57) Blocking Peptide Synthetic peptide Catalog # BP2416b

Specification

RCE1 Antibody (N-term W57) Blocking Peptide - Product Information

Primary Accession

<u>Q9Y256</u>

RCE1 Antibody (N-term W57) Blocking Peptide - Additional Information

Gene ID 9986

Other Names

CAAX prenyl protease 2, 3422-, Farnesylated proteins-converting enzyme 2, FACE-2, Prenyl protein-specific endoprotease 2, RCE1 homolog, hRCE1, RCE1, FACE2, RCE1A, RCE1B

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP2416b was selected from the N-term region of human RCE1 . A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

RCE1 Antibody (N-term W57) Blocking Peptide - Protein Information

Name RCE1

Synonyms FACE2, RCE1A, RCE1B

Function

Proteolytically removes the C-terminal three residues of farnesylated and geranylated proteins. Seems to be able to process K- Ras, N-Ras, H-Ras, RAP1B and G-gamma-1 (PubMed:10085068).

Cellular Location Endoplasmic reticulum membrane; Multi-pass membrane protein

Tissue Location Ubiquitous..

RCE1 Antibody (N-term W57) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

RCE1 Antibody (N-term W57) Blocking Peptide - Background

RCE1 is an integral membrane protein which is classified as a member of the metalloproteinase family. This enzyme is thought to function in the maintenance and processing of CAAX-type prenylated proteins.
