

PGAM1 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP2923c**Specification**

PGAM1 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [P18669](#)**PGAM1 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 5223**Other Names**

Phosphoglycerate mutase 1, BPG-dependent PGAM 1, Phosphoglycerate mutase isozyme B, PGAM-B, PGAM1, PGAMA

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP2923c](/products/AP2923c) was selected from the Center region of human PGAM1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PGAM1 Antibody (Center) Blocking Peptide - Protein Information**Name** PGAM1 ([HGNC:8888](#))**Synonyms** PGAMA**Function**

Catalyzes the interconversion of 2-phosphoglycerate and 3-phosphoglycerate a crucial step in glycolysis, by using 2,3-bisphosphoglycerate (PubMed: [23653202](http://www.uniprot.org/citations/23653202)). Also catalyzes the interconversion of (2R)-2,3-bisphosphoglycerate and (2R)-3-phosphoglyceroyl phosphate (PubMed: [23653202](http://www.uniprot.org/citations/23653202)).

Tissue Location

Expressed in the liver and brain. Not found in the muscle.

PGAM1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PGAM1 Antibody (Center) Blocking Peptide - Background

PGAM1 can be interconversion of 3- and 2-phosphoglycerate with 2,3-bisphosphoglycerate as the primer of the reaction. It can also catalyze the reaction of EC 5.4.2.4 (synthase) and EC 3.1.3.13 (phosphatase), but with a reduced activity.
