

**Phospho-mouse BAD(Y113) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP3777k****Specification**

---

**Phospho-mouse BAD(Y113) Blocking Peptide - Product Information**

Primary Accession [O61337](#)  
Other Accession [O35147](#), [NP\\_031548.1](#)

**Phospho-mouse BAD(Y113) Blocking Peptide - Additional Information**

**Gene ID** 12015

**Other Names**

Bcl2-associated agonist of cell death, BAD, Bcl-2-binding component 6, Bcl-xL/Bcl-2-associated death promoter, Bcl2 antagonist of cell death, Bad, Bbc6

**Target/Specificity**

The synthetic peptide sequence is selected from aa 106-118 of MOUSE Bad

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**Phospho-mouse BAD(Y113) Blocking Peptide - Protein Information**

**Name** Bad

**Synonyms** Bbc6

**Function**

Promotes cell death. Successfully competes for the binding to Bcl-X(L), Bcl-2 and Bcl-W, thereby affecting the level of heterodimerization of these proteins with BAX. Can reverse the death repressor activity of Bcl-X(L), but not that of Bcl-2. Appears to act as a link between growth factor receptor signaling and the apoptotic pathways.

**Cellular Location**

Mitochondrion outer membrane. Cytoplasm. Note=Colocalizes with HIF3A isoform 2 in the cytoplasm (PubMed:21546903). Upon phosphorylation, locates to the cytoplasm.

## **Phospho-mouse BAD(Y113) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

## **Phospho-mouse BAD(Y113) Blocking Peptide - Images**

## **Phospho-mouse BAD(Y113) Blocking Peptide - Background**

Bad may be involved in induction of programmed cell death [RGD].
