

PLA2G4B Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP4919c**Specification**

PLA2G4B Antibody (Center) Blocking Peptide - Product Information

Primary Accession [POC869](#)

PLA2G4B Antibody (Center) Blocking Peptide - Additional Information

Gene ID 100137049;8681

Other Names

Cytosolic phospholipase A2 beta, cPLA2-beta, Phospholipase A2 group IVB, PLA2G4B

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PLA2G4B Antibody (Center) Blocking Peptide - Protein Information

Name PLA2G4B

Function

Calcium-dependent phospholipase A1 and A2 and lysophospholipase that may play a role in membrane phospholipid remodeling.

Cellular Location

[Isoform 3]: Cytoplasm, cytosol. Mitochondrion membrane; Peripheral membrane protein. Early endosome membrane; Peripheral membrane protein. Note=Translocates to membrane vesicles in a calcium-dependent fashion.

Tissue Location

Widely expressed. Expressed at higher level in brain, heart, liver, cerebellum and pancreas

PLA2G4B Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)

PLA2G4B Antibody (Center) Blocking Peptide - Images**PLA2G4B Antibody (Center) Blocking Peptide - Background**

PLA2G4B transcribes naturally-occurring mRNAs that are co-transcribed products of the neighboring JMJD7 and PLA2G4B genes. Incompletely processed read-through transcripts from these two loci are abundantly expressed in most tissues, but the function of the predicted protein product has not yet been determined.
