

MYOZ1 Antibody (Center) Blocking Peptide

Synthetic peptide Catalog # BP5248c

Specification

MYOZ1 Antibody (Center) Blocking Peptide - Product Information

Primary Accession

Q9NP98

MYOZ1 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 58529

Other Names

Myozenin-1, Calsarcin-2, Filamin-, actinin- and telethonin-binding protein, Protein FATZ, MYOZ1 (HGNC:13752)

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MYOZ1 Antibody (Center) Blocking Peptide - Protein Information

Name MYOZ1 (HGNC:13752)

Function

Myozenins may serve as intracellular binding proteins involved in linking Z-disk proteins such as alpha-actinin, gamma- filamin, TCAP/telethonin, LDB3/ZASP and localizing calcineurin signaling to the sarcomere. Plays an important role in the modulation of calcineurin signaling. May play a role in myofibrillogenesis.

Cellular Location

Nucleus. Cell projection, pseudopodium. Note=Localized to the nucleus and pseudopodia of undifferentiated cells and detected throughout the myotubes of differentiated cells Colocalizes with ACTN2, FLNC and MYOT at the Z-lines of skeletal muscle

Tissue Location

Expressed primarily in skeletal muscle. Detected at lower levels in heart, prostate and pancreas

MYOZ1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides
