SACA3 Antibody (N-term) Blocking peptide - Protein Information

Name SPACA3

Synonyms LYC3, LYZL3, SLLP1, SPRASA

Function

Sperm surface membrane protein that may be involved in sperm- egg plasma membrane adhesion and fusion during fertilization. It could be a potential receptor for the egg oligosaccharide residue N- acetylglucosamine, which is present in the extracellular matrix over the egg plasma membrane. The processed form has no detectable bacteriolytic activity in vitro.

Cellular Location

[Isoform 1]: Cytoplasmic vesicle, secretory vesicle, acrosome membrane; Single-pass type II membrane protein. Note=Anterior acrosome in non-capacitated spermatozoa and retained in the equatorial segment and in the luminal face of both the inner and outer acrosomal membranes following capacitation and the acrosome reaction.

Tissue Location

The processed form is expressed in sperm (at protein level). Expressed in testis, epididymis and placenta
