GGTL1 Antibody (C-term) Blocking peptide
Synthetic peptide
Catalog # BP5604b

Specification

GGTL1 Antibody (C-term) Blocking peptide - Product Information

Primary Accession	Q9BX51
Other Accession	NP_842563.1

GGTL1 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 92086

Other Names
Gamma-glutamyltransferase light chain 1, Gamma-glutamyltransferase-like activity 4, Gamma-glutamyltransferase-like protein 6, GGTLC1, GGTLA4

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GGTL1 Antibody (C-term) Blocking peptide - Protein Information

Name GGTLC1

Synonyms GGTLA4

GGTL1 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Blocking Peptides

GGTL1 Antibody (C-term) Blocking peptide - Background

This gene encodes a member of the gamma-glutamyltranspeptidase (GGT) family, which are important in the metabolismof glutathione. The most ubiquitously expressed human GGT gene,GGT1, encodes a single transmembrane polypeptide that ispost-translationally processed to form a heavy and a light chain.In contrast, the product of this gene only contains homology to

thelight chain region, and lacks a transmembrane domain. Multiplealternatively spliced variants, encoding the same protein, havebeen identified.
