

ANKRD27 Antibody (C-term) Blocking peptide Synthetic peptide

Catalog # BP5654b

Specification

ANKRD27 Antibody (C-term) Blocking peptide - Product Information

Primary Accession Other Accession

<u>Q96NW4</u> <u>NP 115515.2</u>

ANKRD27 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 84079

Other Names Ankyrin repeat domain-containing protein 27, VPS9 domain-containing protein, ANKRD27

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ANKRD27 Antibody (C-term) Blocking peptide - Protein Information

Name ANKRD27

Function

May be a guanine exchange factor (GEF) for Rab21, Rab32 and Rab38 and regulate endosome dynamics (PubMed:<a href="http://www.uniprot.org/citations/16525121"

target="_blank">16525121, PubMed:18477474). May regulate the participation of VAMP7 in membrane fusion events; in vitro inhibits VAMP7-mediated SNARE complex formation by trapping VAMP7 in a closed, fusogenically inactive conformation (PubMed:23104059). Involved in peripheral melanosomal distribution of TYRP1 in melanocytes; the function, which probably is implicating vesicle-trafficking, includes cooperation with Rab32, Rab38 and VAMP7 (By similarity). Involved in the regulation of neurite growth; the function seems to require its GEF activity, probably towards Rab21, and VAMP7 but not Rab32/38 (By similarity). Proposed to be involved in Golgi sorting of VAMP7 and transport of VAMP7 vesicles to the cell surface; the function seems to implicate kinesin heavy chain isoform 5 proteins, GOLGA4, RAB21 and MACF1 (PubMed:22705394). Required for the colocalization of VAMP7 and Rab21, probably on TGN sites (PubMed:19745841). Involved in GLUT1 endosome-to-plasma membrane trafficking; the function is dependent of association with VPS29 (PubMed:<a

href="http://www.uniprot.org/citations/24856514" target="_blank">24856514). Regulates the proper trafficking of melanogenic enzymes TYR, TYRP1 and DCT/TYRP2 to melanosomes in melanocytes (By similarity).

Cellular Location

Early endosome. Late endosome. Cytoplasmic vesicle membrane. Lysosome Cell membrane. Melanosome {ECO:0000250|UniProtKB:Q3UMR0}. Note=Colocalizes with VAMP7 in transport vesicles in the shaft of hippocampal neurons (By similarity) {ECO:0000250|UniProtKB:Q3UMR0}

ANKRD27 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Blocking Peptides

ANKRD27 Antibody (C-term) Blocking peptide - Images

ANKRD27 Antibody (C-term) Blocking peptide - Background

ANKRD27 may be a Rab21 guanine exchange factor and regulate endosome dynamics (By similarity).
