

# **BRWD2 Antibody (Center) Blocking peptide**

Synthetic peptide Catalog # BP5715c

# **Specification**

## BRWD2 Antibody (Center) Blocking peptide - Product Information

Primary Accession <u>Q9BZH6</u>
Other Accession <u>NP 060587.8</u>

# BRWD2 Antibody (Center) Blocking peptide - Additional Information

Gene ID 55717

#### **Other Names**

WD repeat-containing protein 11, Bromodomain and WD repeat-containing protein 2, WD repeat-containing protein 15, WDR11, BRWD2, KIAA1351, WDR15

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# BRWD2 Antibody (Center) Blocking peptide - Protein Information

Name WDR11

Synonyms BRWD2, KIAA1351, WDR15

### **Function**

Involved in the Hedgehog (Hh) signaling pathway, is essential for normal ciliogenesis (PubMed:<a href="http://www.uniprot.org/citations/29263200" target="\_blank">29263200</a>). Regulates the proteolytic processing of GLI3 and cooperates with the transcription factor EMX1 in the induction of downstream Hh pathway gene expression and gonadotropin-releasing hormone production (PubMed:<a href="http://www.uniprot.org/citations/29263200" target="\_blank">29263200" target="\_blank">29263200</a>). WDR11 complex facilitates the tethering of Adaptor protein-1 complex (AP-1)- derived vesicles. WDR11 complex acts together with TBC1D23 to facilitate the golgin-mediated capture of vesicles generated using AP-1 (PubMed:<a href="http://www.uniprot.org/citations/29426865" target=" blank">29426865</a>).

# **Cellular Location**

Cytoplasm, cytoskeleton, cilium basal body. Cytoplasm Nucleus Cytoplasm, cytoskeleton, cilium axoneme Cytoplasmic vesicle. Golgi apparatus, trans-Golgi network. Note=Shuttles from the cilium to the nucleus in response to Hh signaling (PubMed:29263200). Might be shuttling between the

nucleus and the cytoplasm (PubMed:20887964)

**Tissue Location** Ubiquitous.

### BRWD2 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

## BRWD2 Antibody (Center) Blocking peptide - Background

WDR11 is a member of the WD repeat proteinfamily. WD repeats are minimally conserved regions of approximately40 amino acids typically bracketed by gly-his and trp-asp (GH-WD), which may facilitate formation of heterotrimeric or multiproteincomplexes. Members of this family are involved in a variety ofcellular processes, including cell cycle progression, signaltransduction, apoptosis, and gene regulation. This gene is located in the chromosome 10q25-26 region, which is frequently deleted ingliomas and tumors of other tissues, and is disrupted by thet(10;19) translocation rearrangement in glioblastoma cells. Thegene location suggests that it is a candidate gene for the tumorsuppressor locus.
