# OFD1 Antibody (Center) Blocking peptide <br> Synthetic peptide <br> Catalog \# BP5909c 

## Specification

## OFD1 Antibody (Center) Blocking peptide - Product Information

Primary Accession
Other Accession

075665
NP 003602.1

## OFD1 Antibody (Center) Blocking peptide - Additional Information

## Gene ID 8481

## Other Names

Oral-facial-digital syndrome 1 protein, Protein 71-7A, OFD1, CXorf5

## Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at $2-8^{\circ} \mathrm{C}$ for up to 6 months. For long term storage store at $-20^{\circ} \mathrm{C}$.

## Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## OFD1 Antibody (Center) Blocking peptide - Protein Information

## Name OFD1

## Synonyms CXorf5

## Function

Component of the centrioles controlling mother and daughter centrioles length. Recruits to the centriole IFT88 and centriole distal appendage-specific proteins including CEP164 (By similarity). Involved in the biogenesis of the cilium, a centriole-associated function. The cilium is a cell surface projection found in many vertebrate cells required to transduce signals important for development and tissue homeostasis (PubMed:<a href="http://www.uniprot.org/citations/33934390" target="_blank">33934390</a>). Plays an important role in development by regulating Wnt signaling and the specification of the left-right axis. Only OFD1 localized at the centriolar satellites is removed by autophagy, which is an important step in the ciliogenesis regulation (By similarity).

## Cellular Location

Cytoplasm, cytoskeleton, microtubule organizing center, centrosome, centriole. Cytoplasm, cytoskeleton, cilium basal body. Nucleus. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome, centriolar satellite Note=Localizes to centriole distal ends and to centriolar satellites (PubMed:20230748, PubMed:24121310). Localization to centrioles and pericentriolar satellites may be mediated by KIAA0753/OFIP (PubMed:26643951).

## Tissue Location

Widely expressed. Expressed in 9 and 14 weeks old embryos in metanephric mesenchyme, oral mucosa, lung, heart, nasal and cranial cartilage, and brain. Expressed in metanephros, brain, tongue, and limb.

## OFD1 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
