

MMP28 Antibody (Center) Blocking Peptide
Synthetic Peptide
Catalog # BP6209a**Specification**

MMP28 Antibody (Center) Blocking Peptide - Product Information

Primary Accession [O9H239](#)
Other Accession [NP_077278](#)

MMP28 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 79148

Other Names

Matrix metalloproteinase-28, MMP-28, 3424-, Epilysin, MMP28, MMP25

Target/Specificity

The synthetic peptide sequence is selected from aa 323-337 of human MMP28.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

MMP28 Antibody (Center) Blocking Peptide - Protein Information

Name MMP28

Synonyms MMP25

Function

Can degrade casein. Could play a role in tissues homeostasis and repair.

Cellular Location

Secreted, extracellular space, extracellular matrix

Tissue Location

Expressed at high levels in testes and lung. Low levels are detected in kidney, pancreas and skin. Also expressed in fetal lung, brain, skeletal muscle and kidney. Expressed selectively in keratinocytes. Widely expressed in several carcinomas as well. Is up-regulated in response to injury in the skin

MMP28 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

MMP28 Antibody (Center) Blocking Peptide - Background

Proteins of the matrix metalloproteinase (MMP) family are involved in the breakdown of extracellular matrix for both normal physiological processes, such as embryonic development, reproduction and tissue remodeling, and disease processes, such as asthma and metastasis. MMP28 is a secreted enzyme that degrades casein. Its expression pattern suggests that it plays a role in tissue homeostasis and in wound repair.
