

ABAD Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP6307b**Specification**

ABAD Antibody (C-term) Blocking Peptide - Product Information

Primary Accession [Q6IBS9](#)

ABAD Antibody (C-term) Blocking Peptide - Additional Information**Target/Specificity**

The synthetic peptide sequence used to generate the antibody [AP6307b](/product/products/AP6307b) was selected from the C-term region of human ABAD. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ABAD Antibody (C-term) Blocking Peptide - Protein Information**ABAD Antibody (C-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

ABAD Antibody (C-term) Blocking Peptide - Images**ABAD Antibody (C-term) Blocking Peptide - Background**

Amyloid b-peptide-binding alcohol dehydrogenase (ABAD) is a member of the family of short chain dehydrogenase/reductases; unique among this family, it binds amyloid b-peptide and exhibits enzymatic activity toward a wide variety of substrates including linear alcohols. In an amyloid beta-abundant environment, ABAD appears to trigger cell stress induced by the amyloid peptide.
