

# DSCR9 Antibody (Center) Blocking Peptide

Synthetic peptide Catalog # BP6322i

#### Specification

#### DSCR9 Antibody (Center) Blocking Peptide - Product Information

Primary Accession

<u>P59020</u>

#### DSCR9 Antibody (Center) Blocking Peptide - Additional Information

**Other Names** Down syndrome critical region protein 9, DSCR9

Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/product/products/AP6322i>AP6322i</a> was selected from the Center region of human DSCR9. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions** This product is for research use only. Not for use in diagnostic or therapeutic procedures.

#### DSCR9 Antibody (Center) Blocking Peptide - Protein Information

Name DSCR9

Tissue Location Testis specific..

#### DSCR9 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Blocking Peptides

### DSCR9 Antibody (Center) Blocking Peptide - Images

## DSCR9 Antibody (Center) Blocking Peptide - Background

The gene for DSCR9 is located in the Down Syndrome Critical Region (DSCR). DSCR9 is expressed

preferentially in testis, and appears to be unique to primate genomes.
