

**KLK15 Antibody (Center N76) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP6334a****Specification**

---

**KLK15 Antibody (Center N76) Blocking Peptide - Product Information**Primary Accession [Q9H2R5](#)**KLK15 Antibody (Center N76) Blocking Peptide - Additional Information****Gene ID** 55554**Other Names**

Kallikrein-15, 3421-, ACO protease, KLK15

**Target/Specificity**

The synthetic peptide sequence used to generate the antibody [AP6334a](/product/products/AP6334a) was selected from the Center region of human KLK15. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**KLK15 Antibody (Center N76) Blocking Peptide - Protein Information****Name** KLK15**Function**

Protease whose physiological substrate is not yet known.

**Cellular Location**

Secreted.

**Tissue Location**

Highest expression in the thyroid gland. Also expressed in the prostate, salivary, and adrenal glands and in the colon testis and kidney.

**KLK15 Antibody (Center N76) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

#### **KLK15 Antibody (Center N76) Blocking Peptide - Background**

Kallikreins are a subgroup of serine proteases having diverse physiological functions. Growing evidence suggests that many kallikreins are implicated in carcinogenesis and some have potential as novel cancer and other disease biomarkers. In prostate cancer, KLK15 has increased expression, which indicates its possible use as a diagnostic or prognostic marker for prostate cancer.
