

#### Mouse Pcp2 Antibody (C-term) Blocking Peptide Synthetic peptide Catalog # BP6356b

## Specification

# Mouse Pcp2 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

## <u>P12660</u>

# Mouse Pcp2 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 18545

**Other Names** Purkinje cell protein 2, Protein PCD-5, Purkinje cell-specific protein L7, Pcp2, Pcp-2

Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/product/products/AP6356b>AP6356b</a> was selected from the C-term region of human Mouse Pcp2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage** Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## Mouse Pcp2 Antibody (C-term) Blocking Peptide - Protein Information

Name Pcp2

Synonyms Pcp-2

**Function** May function as a cell-type specific modulator for G protein- mediated cell signaling.

**Tissue Location** Cerebellum (Purkinje cells) and retinal bipolar neurons

# Mouse Pcp2 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

#### Blocking Peptides

## Mouse Pcp2 Antibody (C-term) Blocking Peptide - Images

## Mouse Pcp2 Antibody (C-term) Blocking Peptide - Background

Pcp2 may function as a cell-type specific modulator for G protein-mediated cell signaling. This protein exhibits tissue specificity for cerebellum (Purkinje cells) and retinal bipolar neurons.
