

DNAJC19 Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP6542b

Specification

DNAJC19 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

Q96DA6

DNAJC19 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 131118

Other Names

Mitochondrial import inner membrane translocase subunit TIM14, DnaJ homolog subfamily C member 19, DNAJC19, TIM14, TIMM14

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP6542b was selected from the C-term region of human DNAJC19. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

DNAJC19 Antibody (C-term) Blocking Peptide - Protein Information

Name DNAJC19

Synonyms TIM14, TIMM14

Function

Mitochondrial co-chaperone which forms a complex with prohibitins to regulate cardiolipin remodeling (By similarity). May be a component of the PAM complex, a complex required for the translocation of transit peptide-containing proteins from the inner membrane into the mitochondrial matrix in an ATP-dependent manner. May act as a co-chaperone that stimulate the ATP-dependent activity (By similarity).

Cellular Location

Mitochondrion inner membrane; Single-pass membrane protein; Matrix side {ECO:0000250|UniProtKB:Q9CQV7}

Tissue LocationUbiquitously expressed.

DNAJC19 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

DNAJC19 Antibody (C-term) Blocking Peptide - Background

DNAJC19 is a probable component of the PAM complex, a complex required for the translocation of transit peptide-containing proteins from the inner membrane into the mitochondrial matrix in an ATP-dependent manner. The protein may act as a co-chaperone that stimulate the ATP-dependent activity.
