

VIP Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP6554b**Specification**

VIP Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [P01282](#)**VIP Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 7432**Other Names**

VIP peptides, Intestinal peptide PHV-42, Peptide histidine valine 42, Intestinal peptide PHM-27, Peptide histidine methioninamide 27, Vasoactive intestinal peptide, VIP, Vasoactive intestinal polypeptide, VIP

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP6554b](/products/AP6554b) was selected from the C-term region of human VIP. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

VIP Antibody (C-term) Blocking Peptide - Protein Information**Name** VIP**Function**

VIP causes vasodilation, lowers arterial blood pressure, stimulates myocardial contractility, increases glycogenolysis and relaxes the smooth muscle of trachea, stomach and gall bladder.

Cellular Location

Secreted.

VIP Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

VIP Antibody (C-term) Blocking Peptide - Background

VIP belongs to the glucagon family. It stimulates myocardial contractility, causes vasodilation, increases glycogenolysis, lowers arterial blood pressure and relaxes the smooth muscle of trachea, stomach and gall bladder.
