

TNFAIP2 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP6593c**Specification**

TNFAIP2 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [Q03169](#)**TNFAIP2 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 7127**Other Names**

Tumor necrosis factor alpha-induced protein 2, TNF alpha-induced protein 2, Primary response gene B94 protein, TNFAIP2

Target/Specificity

The synthetic peptide sequence used to generate the antibody [BP6593c](#) was selected from the Center region of human TNFAIP2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

TNFAIP2 Antibody (Center) Blocking Peptide - Protein Information**Name** TNFAIP2**Function**

May play a role as a mediator of inflammation and angiogenesis.

TNFAIP2 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

TNFAIP2 Antibody (Center) Blocking Peptide - Images**TNFAIP2 Antibody (Center) Blocking Peptide - Background**

TNFAIP2 expression can be induced by the tumor necrosis factor alpha (TNF) in umbilical vein endothelial cells. The expression of TNFAIP2 was shown to be induced by retinoic acid in a cell line expressing a oncogenic version of the retinoic acid receptor alpha fusion protein, which suggested that its gene may be a retinoic acid target gene in acute promyelocytic leukemia.
