

RALGPS1 Antibody (Center) Blocking Peptide

Synthetic peptide Catalog # BP6616c

Specification

RALGPS1 Antibody (Center) Blocking Peptide - Product Information

Primary Accession

05|S13

RALGPS1 Antibody (Center) Blocking Peptide - Additional Information

Gene ID 9649

Other Names

Ras-specific guanine nucleotide-releasing factor RalGPS1, Ral GEF with PH domain and SH3-binding motif 1, Ral guanine nucleotide exchange factor 2, RalGEF 2, RalA exchange factor RalGPS1, RALGPS1, KIAA0351, RALGEF2

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP6616c was selected from the Center region of human RALGPS1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

RALGPS1 Antibody (Center) Blocking Peptide - Protein Information

Name RALGPS1

Synonyms KIAA0351, RALGEF2

Function

Guanine nucleotide exchange factor (GEF) for the small GTPase RALA. May be involved in cytoskeletal organization (By similarity). Guanine nucleotide exchange factor for.

Cellular Location

Cytoplasm. Cell membrane. Note=Associates with membranes through the PH domain

Tissue Location

Widely expressed (at protein level). Isoform 2 is expressed in brain, colon, kidney, pancreas,

Tel: 858.875.1900 Fax: 858.875.1999

prostate, skeletal muscle, small intestine, testis, thymus and uterus. Isoform 1 is expressed at high levels in heart and testis and at lower levels in brain, pancreas, skeletal muscle, small intestine and thymus

RALGPS1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

RALGPS1 Antibody (Center) Blocking Peptide - Background

RALGPS1 may be involved in cytoskeletal organization. The protein may also be involved in the stimulation of transcription in a Ras-independent fashion. It is a quanine nucleotide exchange factor for the small GTPase RALA.
