

ETHE1 Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP6641b**Specification**

ETHE1 Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [O95571](#)**ETHE1 Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 23474**Other Names**

Persulfide dioxygenase ETHE1, mitochondrial, Ethylmalonic encephalopathy protein 1, Hepatoma subtracted clone one protein, Sulfur dioxygenase ETHE1, ETHE1, HSCO

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP6641b](/products/AP6641b) was selected from the C-term region of human ETHE1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ETHE1 Antibody (C-term) Blocking Peptide - Protein Information**Name** ETHE1**Synonyms** HSCO**Function**

Sulfur dioxygenase that plays an essential role in hydrogen sulfide catabolism in the mitochondrial matrix. Hydrogen sulfide (H₂S) is first oxidized by SQRDL, giving rise to cysteine persulfide residues. ETHE1 consumes molecular oxygen to catalyze the oxidation of the persulfide, once it has been transferred to a thiophilic acceptor, such as glutathione (R-SSH). Plays an important role in metabolic homeostasis in mitochondria by metabolizing hydrogen sulfide and preventing the accumulation of supraphysiological H₂S levels that have toxic effects, due to the inhibition of cytochrome c oxidase. First described as a protein that can shuttle between the nucleus and the cytoplasm and suppress p53-induced apoptosis by sequestering the transcription factor RELA/NFKB3 in the cytoplasm and preventing its accumulation in the nucleus (PubMed:12398897).

Cellular Location

Cytoplasm. Nucleus. Mitochondrion matrix

Tissue Location

Ubiquitously expressed.

ETHE1 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

ETHE1 Antibody (C-term) Blocking Peptide - Images**ETHE1 Antibody (C-term) Blocking Peptide - Background**

ETHE1 is a sulfur dioxygenase that localizes within the mitochondrial matrix. The enzyme functions in sulfide catabolism. Mutations in its gene result in ethylmalonic encephalopathy.
