SERPIND1 Antibody (N-term) Blocking Peptide

Synthetic peptide
Catalog # BP6706a

Specification

SERPIND1 Antibody (N-term) Blocking Peptide - Product Information

Primary Accession P05546

SERPIND1 Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 3053

Other Names
Heparin cofactor 2, Heparin cofactor II, HC-II, Protease inhibitor leuserpin-2, HLS2, Serpin D1, SERPIND1, HCF2

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

SERPIND1 Antibody (N-term) Blocking Peptide - Protein Information

Name SERPIND1

Synonyms HCF2

Function
Thrombin inhibitor activated by the glycosaminoglycans, heparin or dermatan sulfate. In the presence of the latter, HC-II becomes the predominant thrombin inhibitor in place of antithrombin III (AT-III). Also inhibits chymotrypsin, but in a glycosaminoglycan- independent manner.

Tissue Location
Expressed predominantly in liver. Also present in plasma

SERPIND1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

SERPIND1 Antibody (N-term) Blocking Peptide - Background

SERPIND1 is a serine proteinase inhibitor which rapidly inhibits thrombin in the presence of dermatan sulfate or heparin. This protein shares homology with antithrombin III and other members of the alpha 1-antitrypsin superfamily. Mutations in its gene are associated with heparin cofactor II deficiency.
