

ECE1 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP6855d**Specification**

ECE1 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [P42892](#)**ECE1 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 1889**Other Names**

Endothelin-converting enzyme 1, ECE-1, ECE1

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP6855d](/products/AP6855d) was selected from the Center region of human ECE1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ECE1 Antibody (Center) Blocking Peptide - Protein Information**Name** ECE1**Function**

Converts big endothelin-1 to endothelin-1.

Cellular Location

Cell membrane; Single-pass type II membrane protein

Tissue Location

All isoforms are expressed in umbilical vein endothelial cells, polynuclear neutrophils, fibroblasts, atrium cardiomyocytes and ventricles. Isoforms A, B and C are also expressed in placenta, lung, heart, adrenal gland and pheochromocytoma; isoforms A and C in liver, testis and small intestine; isoform B, C and D in endothelial cells and umbilical vein smooth muscle cells; isoforms C and D in saphenous vein cells, and isoform C in kidney

ECE1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
