

BACH Antibody (Center) Blocking Peptide Synthetic peptide

Catalog # BP6949c

Specification

BACH Antibody (Center) Blocking Peptide - Product Information

Primary Accession

<u>000154</u>

BACH Antibody (Center) Blocking Peptide - Additional Information

Gene ID 11332

Other Names

Cytosolic acyl coenzyme A thioester hydrolase, Acyl-CoA thioesterase 7, Brain acyl-CoA hydrolase, BACH, CTE-IIa, CTE-II, Long chain acyl-CoA thioester hydrolase, ACOT7, BACH

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP6949c was selected from the Center region of human BACH. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

BACH Antibody (Center) Blocking Peptide - Protein Information

Name ACOT7

Synonyms BACH

Function

Catalyzes the hydrolysis of acyl-CoAs into free fatty acids and coenzyme A (CoASH), regulating their respective intracellular levels (PubMed:10578051). Preferentially hydrolyzes palmitoyl-CoA, but has a broad specificity acting on other fatty acyl-CoAs with chain- lengths of C8-C18 (PubMed:10578051). May play an important physiological function in brain (PubMed:10578051). May play an important physiological function in brain (PubMed:10578051).

Cellular Location

[Isoform 4]: Cytoplasm, cytosol [Isoform 1]: Mitochondrion

Tissue Location Isoform 4 is expressed exclusively in brain.

BACH Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

<u>Blocking Peptides</u>

BACH Antibody (Center) Blocking Peptide - Images

BACH Antibody (Center) Blocking Peptide - Background

BACH is a member of the acyl coenzyme family. This protein hydrolyzes the CoA thioester of palmitoyl-CoA and other long-chain fatty acids.
