

CABC1 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP7116a**Specification**

CABC1 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q8NI60](#)**CABC1 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 56997**Other Names**

Chaperone activity of bc1 complex-like, mitochondrial, Chaperone-ABC1-like, 2711-, aarF domain-containing protein kinase 3, ADCK3, CABC1

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7116a](/product/products/AP7116a) was selected from the N-term region of human CABC1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CABC1 Antibody (N-term) Blocking Peptide - Protein Information**Name** COQ8A {ECO:0000303|PubMed:27499294, ECO:0000312|HGNC:HGNC:16812}**Function**

Atypical kinase involved in the biosynthesis of coenzyme Q, also named ubiquinone, an essential lipid-soluble electron transporter for aerobic cellular respiration (PubMed:[25498144](http://www.uniprot.org/citations/25498144), PubMed:[21296186](http://www.uniprot.org/citations/21296186), PubMed:[25540914](http://www.uniprot.org/citations/25540914), PubMed:[27499294](http://www.uniprot.org/citations/27499294)). Its substrate specificity is unclear: does not show any protein kinase activity (PubMed:[25498144](http://www.uniprot.org/citations/25498144), PubMed:[27499294](http://www.uniprot.org/citations/27499294)). Probably acts as a small molecule kinase, possibly a lipid kinase that phosphorylates a prenyl lipid in the ubiquinone biosynthesis pathway, as suggested by its ability to bind coenzyme Q lipid

intermediates (PubMed:25498144, PubMed:27499294). Shows an unusual selectivity for binding ADP over ATP (PubMed:25498144).

Cellular Location

Mitochondrion. Membrane; Single-pass membrane protein {ECO:0000255, ECO:0000305|PubMed:25216398}

Tissue Location

Widely expressed, with highest levels in adrenal gland, heart, pancreas, nasal mucosa, stomach, uterus and skeletal muscle.

CABC1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CABC1 Antibody (N-term) Blocking Peptide - Images**CABC1 Antibody (N-term) Blocking Peptide - Background**

CABC1 is one of several proteins for which expression is induced by p53 expression. The *S. pombe* homolog, ABC1, encodes a chaperone-like protein essential for the proper conformation and functioning of protein complexes in the respiratory chain.
