Guanylyl Cyclase alpha 2 (GUCY1A2) Antibody (N-term) Blocking peptide

Synthetic peptide
Catalog # BP7133a

Specification

Guanylyl Cyclase alpha 2 (GUCY1A2) Antibody (N-term) Blocking peptide - Product Information

Primary Accession P33402

Guanylyl Cyclase alpha 2 (GUCY1A2) Antibody (N-term) Blocking peptide - Additional Information

Gene ID 2977

Other Names
Guanylate cyclase soluble subunit alpha-2, GCS-alpha-2, GUCY1A2, GUC1A2, GUCSA2

Target/Specificity
The synthetic peptide sequence used to generate the antibody AP7133a was selected from the N-term region of human GUCY1A2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format
Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage
Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions
This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Guanylyl Cyclase alpha 2 (GUCY1A2) Antibody (N-term) Blocking peptide - Protein Information

Name GUCY1A2

Synonyms GUC1A2, GUCSA2

Function
Has guanylyl cyclase on binding to the beta-1 subunit.

Cellular Location
Cytoplasm.

Tissue Location
Isoform 1 is expressed in fetal brain, liver, colon, endothelium and testis. Isoform 2 is expressed

only in liver, colon and endothelium

Guanylyl Cyclase alpha 2 (GUCY1A2) Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Blocking Peptides

Guanylyl Cyclase alpha 2 (GUCY1A2) Antibody (N-term) Blocking peptide - Images

Guanylyl Cyclase alpha 2 (GUCY1A2) Antibody (N-term) Blocking peptide - Background

Soluble guanylate cyclase (sGC), a heterodimeric protein consisting of an alpha and a beta subunit, catalyzes the conversion of GTP to the second messenger cGMP and functions as the main receptor for nitric oxide and nitrovasodilator drugs.
