

RFK Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP7183b**Specification**

RFK Antibody (C-term) Blocking Peptide - Product InformationPrimary Accession [Q969G6](#)**RFK Antibody (C-term) Blocking Peptide - Additional Information****Gene ID** 55312**Other Names**

Riboflavin kinase, ATP:riboflavin 5'-phosphotransferase, Flavokinase, RFK

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7183b](/product/products/AP7183b) was selected from the C-term region of human RFK. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

RFK Antibody (C-term) Blocking Peptide - Protein Information**Name** RFK**Function**

Catalyzes the phosphorylation of riboflavin (vitamin B2) to form flavin-mononucleotide (FMN), hence rate-limiting enzyme in the synthesis of FAD. Essential for TNF-induced reactive oxygen species (ROS) production. Through its interaction with both TNFRSF1A and CYBA, physically and functionally couples TNFRSF1A to NADPH oxidase. TNF- activation of RFK may enhance the incorporation of FAD in NADPH oxidase, a critical step for the assembly and activation of NADPH oxidase.

Cellular Location

Cytoplasm.

Tissue Location

Detected in brain, placenta and urinary bladder.

RFK Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
