

# RPS6KL1 Antibody (N-term) Blocking Peptide

Synthetic peptide Catalog # BP7234a

### **Specification**

## RPS6KL1 Antibody (N-term) Blocking Peptide - Product Information

**Primary Accession** 

**09Y6S9** 

## RPS6KL1 Antibody (N-term) Blocking Peptide - Additional Information

**Gene ID 83694** 

#### **Other Names**

Ribosomal protein S6 kinase-like 1, RPS6KL1

### Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/product/products/AP7234a>AP7234a</a> was selected from the N-term region of human RPS6KL1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## RPS6KL1 Antibody (N-term) Blocking Peptide - Protein Information

Name RPS6KL1

### RPS6KL1 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### • Blocking Peptides

### RPS6KL1 Antibody (N-term) Blocking Peptide - Background

The RSK (ribosomal S6 kinase) family comprises growth factor-regulated serine/threonine kinases, known also as p90(rsk). Homologs of RSK exist in several species. The highly conserved feature of

all members of the RSK family is the presence of 2 nonidentical kinase catalytic domains. RSKs are implicated in the activation of the mitogen-activated kinase (MAPK) cascade and the stimulation of cell proliferation (at the transition between phases G0 and G1 of the cell cycle) and differentiation.
