

**CA5B Antibody (C-term) Blocking Peptide**  
**Synthetic peptide**  
**Catalog # BP7308b****Specification**

---

**CA5B Antibody (C-term) Blocking Peptide - Product Information**

Primary Accession [Q9Y2D0](#)

**CA5B Antibody (C-term) Blocking Peptide - Additional Information**

**Gene ID** 11238

**Other Names**

Carbonic anhydrase 5B, mitochondrial, Carbonate dehydratase VB, Carbonic anhydrase VB, CA-VB, CA5B

**Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

**Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

**CA5B Antibody (C-term) Blocking Peptide - Protein Information**

**Name** CA5B

**Function**

Mitochondrial carbonic anhydrase that catalyzes the reversible conversion of carbon dioxide to bicarbonate/HCO<sub>3</sub>.

**Cellular Location**

Mitochondrion.

**Tissue Location**

Strongest expression in heart, pancreas, kidney, placenta, lung, and skeletal muscle. Not expressed in liver

**CA5B Antibody (C-term) Blocking Peptide - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**CA5B Antibody (C-term) Blocking Peptide - Images****CA5B Antibody (C-term) Blocking Peptide - Background**

CA5B belongs a large family of zinc metalloenzymes that catalyze the reversible hydration of carbon dioxide. This protein is localized in the mitochondria and shows the highest sequence similarity to the other mitochondrial CA, CA VA. The protein has a wider tissue distribution than CA VA, which is restricted to the liver.
