

Mouse Hmx3 Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP7424b

Specification

Mouse Hmx3 Antibody (C-term) Blocking Peptide - Product Information

Primary Accession

P42581

Mouse Hmx3 Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 15373

Other Names

Homeobox protein HMX3, Homeobox protein H6 family member 3, Homeobox protein Nkx-51, Hmx3, Nkx-51, Nkx5-1

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP7424b was selected from the C-term region of human Mouse Hmx3. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Mouse Hmx3 Antibody (C-term) Blocking Peptide - Protein Information

Name Hmx3

Synonyms Nkx-5.1, Nkx5-1

Function

Transcription factor involved in specification of neuronal cell types and which is required for inner ear and hypothalamus development. Binds to the 5'-CAAGTG-3' core sequence. Controls semicircular canal formation in the inner ear. Also required for hypothalamic/pituitary axis of the CNS.

Cellular Location

Nucleus.

Tissue Location

Expressed in the developing CNS, including a specific expression in vestibular structures throughout inner ear development.

Mouse Hmx3 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Mouse Hmx3 Antibody (C-term) Blocking Peptide - Background

Hmx3 is a transcription factor involved in specification of neuronal cell types and which is required for inner ear and hypothalamus development. This protein binds to the 5'-CAAGTG-3' core sequence. It controls semicircular canal formation in the inner ear and is also required for hypothalamic/pituitary axis of the CNS.
