

# FASN Antibody (Center) Blocking Peptide

Synthetic peptide Catalog # BP7449c

## **Specification**

## FASN Antibody (Center) Blocking Peptide - Product Information

Primary Accession

P49327

## FASN Antibody (Center) Blocking Peptide - Additional Information

**Gene ID 2194** 

#### **Other Names**

Fatty acid synthase, [Acyl-carrier-protein] S-acetyltransferase, [Acyl-carrier-protein] S-malonyltransferase, 3-oxoacyl-[acyl-carrier-protein] synthase, 3-oxoacyl-[acyl-carrier-protein] reductase, 3-hydroxyacyl-[acyl-carrier-protein] dehydratase, Enoyl-[acyl-carrier-protein] reductase, Oleoyl-[acyl-carrier-protein] hydrolase, FASN, FAS

### Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/products/AP7449c>AP7449c</a> was selected from the Center region of human FASN. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## FASN Antibody (Center) Blocking Peptide - Protein Information

## **Name FASN**

### **Synonyms FAS**

#### **Function**

Fatty acid synthetase is a multifunctional enzyme that catalyzes the de novo biosynthesis of long-chain saturated fatty acids starting from acetyl-CoA and malonyl-CoA in the presence of NADPH. This multifunctional protein contains 7 catalytic activities and a site for the binding of the prosthetic group 4'-phosphopantetheine of the acyl carrier protein ([ACP]) domain.

#### **Cellular Location**

Cytoplasm. Melanosome. Note=Identified by mass spectrometry in melanosome fractions from

## stage I to stage IV

#### **Tissue Location**

Ubiquitous. Prominent expression in brain, lung, liver and mammary gland.

## FASN Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

## FASN Antibody (Center) Blocking Peptide - Background

FASN is a multifunctional protein. Its main function is to catalyze the synthesis of palmitate from acetyl-CoA and malonyl-CoA, in the presence of NADPH, into long-chain saturated fatty acids. In some cancer cell lines, this protein has been found to be fused with estrogen receptor-alpha (ER-alpha), in which the N-terminus of FAS is fused in-frame with the C-terminus of ER-alpha.
