

# EN2 Antibody (C-term-2) Blocking Peptide

Synthetic peptide Catalog # BP7457d

## **Specification**

# EN2 Antibody (C-term-2) Blocking Peptide - Product Information

**Primary Accession** 

P19622

# EN2 Antibody (C-term-2) Blocking Peptide - Additional Information

**Gene ID 2020** 

#### **Other Names**

Homeobox protein engrailed-2, Homeobox protein en-2, Hu-En-2, EN2

## Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/products/AP7457d>AP7457d</a> was selected from the C-term-2 region of human EN2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

# EN2 Antibody (C-term-2) Blocking Peptide - Protein Information

Name EN2

**Cellular Location** 

Nucleus.

## EN2 Antibody (C-term-2) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

## EN2 Antibody (C-term-2) Blocking Peptide - Background

Tel: 858.875.1900 Fax: 858.875.1999

EN2 is thought to have a role in controlling development. In Drosophila, the protein plays an important role during development in segmentation, where it is required for the formation of posterior compartments. Different mutations in the mouse homologs, En1 and En2, produced different developmental defects that frequently are lethal. This protein has been implicated in the control of pattern formation during development of the central nervous system.
