

RGN Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP7487c**Specification**

RGN Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [Q15493](#)**RGN Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 9104**Other Names**

Regucalcin, RC, Gluconolactonase, GNL, Senescence marker protein 30, SMP-30, RGN, SMP30

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7487c](/products/AP7487c) was selected from the Center region of human RGN. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

RGN Antibody (Center) Blocking Peptide - Protein Information**Name** RGN**Synonyms** SMP30**Function**

Gluconolactonase with low activity towards other sugar lactones, including gulonolactone and galactonolactone. Can also hydrolyze diisopropyl phosphorofluoridate and phenylacetate (in vitro). Calcium-binding protein. Modulates Ca(2+) signaling, and Ca(2+)- dependent cellular processes and enzyme activities (By similarity).

Cellular Location

Cytoplasm.

RGN Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

RGN Antibody (Center) Blocking Peptide - Background

RGN is a highly conserved, calcium-binding protein, that is preferentially expressed in the liver and kidney. This protein may have an important role in calcium homeostasis. Studies in rat indicate that the protein may also play a role in aging, as it shows age-associated down-regulation.
