

PRP4 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP7551a**Specification**

PRP4 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q13523](#)**PRP4 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 8899**Other Names**

Serine/threonine-protein kinase PRP4 homolog, PRP4 kinase, PRP4 pre-mRNA-processing factor 4 homolog, PRPF4B, KIAA0536, PRP4, PRP4H, PRP4K

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7551a](/product/products/AP7551a) was selected from the N-term region of human PRP4. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

PRP4 Antibody (N-term) Blocking Peptide - Protein Information**Name** PRPF4B**Synonyms** KIAA0536, PRP4, PRP4H, PRP4K**Function**

Has a role in pre-mRNA splicing. Phosphorylates SF2/ASF.

Cellular Location

Nucleus.

Tissue Location

Ubiquitous.

PRP4 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

PRP4 Antibody (N-term) Blocking Peptide - Background

Pre-mRNA splicing occurs in two sequential transesterification steps, and PRP4 is thought to be involved in pre-mRNA splicing and in signal transduction. This protein belongs to a kinase family that includes serine/arginine-rich protein-specific kinases and cyclin-dependent kinases (CDKs). This protein is regarded as a CDK-like kinase (Clk) with homology to mitogen-activated protein kinases (MAPKs).
