

FARSA Antibody (C-term) Blocking Peptide
Synthetic peptide
Catalog # BP7566b**Specification**

FARSA Antibody (C-term) Blocking Peptide - Product Information

Primary Accession [Q9Y285](#)

FARSA Antibody (C-term) Blocking Peptide - Additional Information

Gene ID 2193

Other Names

Phenylalanine--tRNA ligase alpha subunit, CML33, Phenylalanyl-tRNA synthetase alpha subunit, PheRS, FARSA, FARS, FARSL, FARSLA

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP7566b](/products/AP7566b) was selected from the C-term region of human FARSA. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

FARSA Antibody (C-term) Blocking Peptide - Protein Information

Name FARSA

Synonyms FARS, FARSL, FARSLA

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:Q505J8}.

FARSA Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

FARSA Antibody (C-term) Blocking Peptide - Images**FARSA Antibody (C-term) Blocking Peptide - Background**

Aminoacyl-tRNA synthetases are a class of enzymes that charge tRNAs with their cognate amino acids. FARSA is similar to the catalytic subunit of prokaryotic and *Saccharomyces cerevisiae* phenylalanyl-tRNA synthetases (PheRS). This protein has been shown to be expressed in a tumor-selective and cell cycle stage- and differentiation-dependent manner, the first member of the tRNA synthetase gene family shown to exhibit this type of regulated expression.
