

CDK5R2(p39) Antibody (N-term) Blocking Peptide Synthetic peptide Catalog # BP7742a

Specification

CDK5R2(p39) Antibody (N-term) Blocking Peptide - Product Information

Primary Accession

<u>Q13319</u>

CDK5R2(p39) Antibody (N-term) Blocking Peptide - Additional Information

Gene ID 8941

Other Names

Cyclin-dependent kinase 5 activator 2, CDK5 activator 2, Cyclin-dependent kinase 5 regulatory subunit 2, p39, p39I, CDK5R2, NCK5AI

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP7742a was selected from the p39 region of human CDK5R2(p39). A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CDK5R2(p39) Antibody (N-term) Blocking Peptide - Protein Information

Name CDK5R2

Synonyms NCK5AI

Function Activator of CDK5/TPKII.

Cellular Location Cell membrane; Lipid-anchor; Cytoplasmic side

Tissue Location Brain and neuron specific.

CDK5R2(p39) Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

CDK5R2(p39) Antibody (N-term) Blocking Peptide - Background

CDK5R2(p39) is a neuron-specific activator of CDK5 kinase. It associates with CDK5 to form an active kinase. This protein and neuron-specific CDK5 activator CDK5R1/p39NCK5A both share limited similarity to cyclins, and thus may define a distinct family of cyclin-dependent kinase activating proteins.
