

## SGK2 Antibody (C-term) Blocking Peptide

Synthetic peptide Catalog # BP7947b

### **Specification**

## SGK2 Antibody (C-term) Blocking Peptide - Product Information

**Primary Accession** 

Q9HBY8

# SGK2 Antibody (C-term) Blocking Peptide - Additional Information

**Gene ID 10110** 

#### **Other Names**

Serine/threonine-protein kinase Sgk2, Serum/glucocorticoid-regulated kinase 2, SGK2

#### Target/Specificity

The synthetic peptide sequence used to generate the antibody <a href=/product/products/AP7947b>AP7947b</a> was selected from the C-term region of human SGK2 . A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

## SGK2 Antibody (C-term) Blocking Peptide - Protein Information

## Name SGK2

#### **Function**

Serine/threonine-protein kinase which is involved in the regulation of a wide variety of ion channels, membrane transporters, cell growth, survival and proliferation. Up-regulates Na(+) channels: SCNN1A/ENAC, K(+) channels: KCNA3/Kv1.3, KCNE1 and KCNQ1, amino acid transporter: SLC6A19, glutamate transporter: SLC1A6/EAAT4, glutamate receptors: GRIA1/GLUR1 and GRIK2/GLUR6, Na(+)/H(+) exchanger: SLC9A3/NHE3, and the Na(+)/K(+) ATPase.

# **Cellular Location** Cytoplasm. Nucleus

## **Tissue Location**

Highly expressed in liver, kidney and pancreas, and at lower levels in brain.

# SGK2 Antibody (C-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

## SGK2 Antibody (C-term) Blocking Peptide - Background

SGK2, a Ser/Thr protein kinase, is similar to serum- and glucocorticoid-induced protein kinase (SGK), but this gene product is not induced by serum or glucocorticoids. Expression is induced in response to signals that activate phosphatidylinositol 3-kinase, which is also true for SGK.
